

The Chinese Journal of Dental Research

The Official Journal of the
Chinese Stomatological Association (CSA)

GUIDELINES FOR AUTHORS

The *Chinese Journal of Dental Research* is a peer-reviewed general dental journal published in English by the Chinese Stomatological Association. The Journal publishes original articles, short communications, invited reviews, and case reports. Manuscripts are welcome from any part of the world. The Journal is currently published quarterly and distributed internationally by Quintessence Publishing Co Ltd.

All authors are asked to adhere to the following guidelines.

Manuscript submission

ScholarOne Manuscripts for The Chinese Journal of Dental Research (CJDR) has been launched.

To submit your outstanding research results more quickly, please visit: <http://mc03.manuscriptcentral.com/cjdr>

Any questions, please contact:

4F, Tower C, Jia 18#, Zhongguancun South Avenue, HaiDian District, 100081, Beijing, P.R. China. E-mail: editor@cjdrca.com;
Tel: 86-10-82195785; Fax: 86-10-62173402.

Submitted manuscripts must be unpublished original papers that are not under consideration for publication elsewhere. Submissions that have been published with essentially the same content will not be considered. This restriction does not apply to results published as an abstract. The submission of a manuscript by the authors means that the authors automatically agree to assign exclusive licence to the copyright to Quintessence Publishing Co Ltd if and when the manuscript is accepted for publication.

Manuscripts must be accompanied by a letter from all authors or from one author on behalf of all the authors containing a statement that the manuscript has been read and approved by all the authors and the criteria for authorship have been met. It should also contain the following statement: "The attached (enclosed) paper entitled ... has not been published and is not being submitted for publication, in whole or in part, elsewhere."

Manuscripts that reveal a lack of proper ethical consideration for human subjects or experimental animals will not be accepted for publication. The Journal endorses the Recommendations from the Declaration of Helsinki.

Format of Papers

Preparation of manuscripts

The manuscript should be written clearly and concisely and be double-spaced on 21 x 29 cm white paper with at least 2.5 cm margin all around. All pages should be numbered, beginning from section of title page, and followed by abstract, introduction, materials and methods, results, discussion, acknowledgements, references, figure legends and figures/tables. Non-standard abbreviations should be defined when first used in the text. Use a standard font such as Times New Roman or Arial to avoid misrepresentation of your data on different computers that do not have the unusual or foreign language fonts. For units, the Journal recommends the use of the International System of Units (SI Units). For authors whose native language is not English, the Journal strongly recommends improving the English in the manuscript by consulting an English-speaking scientist before submission.

Title page should include: full title (a brief declarative statement of the major findings of the research), full names of authors, professional affiliations and complete postal address, telephone and fax number, and email address of the corresponding author. If the work was supported by a grant, indicate the name of the supporting organisation and the grant number.

Abstract and keywords: 250 words presented in a concise form and including the purpose, general methods, findings, and conclusions of the research described in the paper. A list of 5 keywords or short phrases (a few words per phrase) suitable for indexing should be typed at the bottom of the abstract page. Avoid vague or overly general terms. If necessary, the keywords will be adjusted to the standards of the Journal by the editors without consulting the authors.

Introduction: should begin with a brief introduction of background related to the research and should be as concise as possible. The rationale of the study should be stated.

Materials and Methods: should be described clearly and referenced in sufficient detail. Description should be such that the reader can judge the accuracy, reproducibility, reliability, etc. of the work.

Results: should present the experimental data in tables and figures with suitable descriptions and avoid extended discussions of its relative significance.

Discussion: should focus on the interpretation and significance of the findings with concise objective comments. Speculation is to be based on data only. The text should be written with a logical connection between the introduction and conclusions.

Acknowledgements: should only recognise individuals who provided assistance to the project.

References: should be cited in the text using superscript numbers and typed in numerical order following a style below:

1. Sorensen JA, Engleman MT, Torres TJ, Avera SP. Shear bond strength of composite resin to porcelain. *Int J Prosthodont* 1991;4:17-23.
2. Renner RP, Boucher LJ. Removable Particle Dentures. Chicago: Quintessence, 1987:24-30.
3. White GE, Johson A van Noort R, Northeast SE, Winstanley B. The quality of cast metal ceramic crowns made for the NHS [abstract 48]. *J Dent Res* 1990;69(special issue):960.
4. Jones DW. The strength and strengthening mechanisms of dental ceramics. In: McLean JW (ed). *Dental ceramics: Proceedings of the First International Symposium on Ceramics*. Chicago: Quintessence, 1983:83-41.
5. Rosenstiel S. *The Marginal Reproduction of Two Elasto meric Impression Materials* [Master's thesis]. Indianapolis: Indiana University, 1997.

Figures and Tables: should be numbered consecutively with Arabic numerals, with each one displayed on a separate page. Photographs should be of excellent quality with a width of 8 cm or 17 cm. All figures and tables should be cited in the text. Please refer to a current volume of this Journal for general guidance.

Legends for all figures, including charts and graphs, must be typed together on a separate page and should be understandable without reference to the text, including a title highlighting the key results and a key for any symbols or abbreviations used in the figure.

Case reports

Authors should describe one to three patients or a single family. The text is limited to no more than 2500 words, and up to 15 references.

Revised Manuscripts

All revisions must be accompanied by a cover letter to the Editor. The letter must detail on a point-by-point basis the contributors' disposition of each of the referees' comments, and certify that all contributors approve of the revised content.
